GREEK COINS AND THEIR VALUES

By David R. Sear

I EUROPE

This completely new catalogue of Greek coins from Seaby Publications provides a listing, with values, of virtually every main type of Hellenic coinage. The average collector should be able to locate in this catalogue all of the coins he is likely to encounter on the market. The numerous historical and geographical notes provide valuable background information.

This first volume covers the Greek coins of Europe, arranged in geographical order from Spain in the west to the Peloponnesus and Crete. These are complemented by a representative selection of contemporary Celtic coins of Spain, Gaul, Britain and central Europe, the designs of which are largely derived from Greek coin types.

The Keeper and staff of the Department of Coins and Medals of the British Museum have kindly assisted in selecting the 3395 coins listed in this volume. 1500 coins are illustrated from photographs taken by P. Frank Purvey from coins in the British Museum, many of which had never before been photographed for publication. In many instances the weight of individual coins is given, and every coin has a reference to the British Museum Catalogue of Greek Coins or another appropriate work, or to a specific museum collection.

The illustrated preface contains sections on collecting Greek coins, Greek history and the development of coinage, Greek coin types, weight standards and denominations, the dating of Greek coins, and a bibliography of reference books and other sources quoted in the catalogue. Also included are a table of ancient alphabets, 13 specially-drawn maps and a comprehensive index.

Volume II, to be published in the autumn of 1979, will begin with the origins of coinage in Asia Minor. Its contents will comprise the issues of the Greek cities of Asia, the Persian empire, the empire of Alexander the Great and the kingdoms of his successors in Syria and Egypt, Palestine, and the coins of the Greeks and Carthaginians in North Africa. It too has been based on the collection of the British Museum. Together these two volumes will offer the collector and student a microcosm of the world's finest collection of Greek coins.

New Edition now available —

ROMAN SILVER COINS

VOL. I. THE REPUBLIC TO AUGUSTUS

This has proved to be one of the most popular volumes in the series on Roman Silver Coins written by H. A. Seaby.

This new edition has been revised and repriced throughout by David R. Sear and Robert Loosley. It now incorporates the new chronology of the Republican coins as published in Michael Crawford's *Roman Republican Coins* (Cambridge, 1974). The basic arrangement of this catalogue remains that of Babelon's *Monnaies de la republique romaine* (1885-6), but Crawford references are now included where appropriate.

In addition, with the cooperation of the Keeper of the Department of Coins and Medals, British Museum, it has now been possible to replace all the original line drawings with 784 photographs of coins in the British Museum.

The values represent the authors' estimate of selling price of coins in VF (very fine) condition as of January 1978.

Other volumes in this series, currently out of print, are in the process of revision. Volume II, Tiberius to Commodus, will appear in 1979.

ROMAN COINS AND THEIR VALUES

by David R. Sear

This is a must for every collector of Roman coins, and the ideal introduction for the beginner. The only single-volume handbook of Roman coins, it catalogues a representative cross-section of Roman coinage from the Republic to the fall of Rome, as well as a small sampling of typical Greek imperial issues. Over 4300 coins in all metals and denominations are briefly described and cross-referenced to the standard works. Retail values are given for specimens in VF (very fine) condition. The 12 plates include only a fraction of the coins listed, but many others are illustrated by line drawings throughout the text.

In addition, **Roman Coins and Their Values** is a gold mine of background information. The introduction presents the necessary basics regarding denominations, reverse types, countermarks, mints and mint-marks and methods of dating. Each emperor or imperial family member who appeared on coinage is introduced by a biographical sketch, a typical coin portrait and, where applicable, a list of mints and table of titles by which his coins may be dated.

Revised second edition, 1974. 376 pages, 12 plates, map, chronological list of Byzantine rulers, bibliography, conversion tables, index. Hardcover. \$13.50

BYZANTINE COINS AND THEIR VALUES

by David R. Sear

The extreme popularity and utility of **Roman Coins and Their Values** created the demand for a similar treatment of Byzantine coins. The result is **Byzantine Coins and Their Values**.

This is a single-volume handbook designed for the collector. Its format is based on that of **Roman Coins and Their Values**, with the difference that virtually *every* main type of Byzantine coin is comprised in the 2260 lots described. Standard references, major collections and/or trade lists are cited for each coin. Retail values are given for specimens in VF (very fine) condition for gold and silver denominations, F (fine) condition for bronze. Over 600 coins photos appear throughout the text.

A biographical sketch of each emperor precedes his coinage, along with a list of associated rulers and other personages represented on the coinage. Introductory material includes several maps as well as essays on collecting Byzantine coins, the types of the Byzantine coinage, mints and mint-marks, denominations, the Byzantine dating system and inscriptions. Other features include a table of monograms, index, conversion tables and bibliography. First published in 1974. 415 pages. Hardcover. \$17.50

READINGS IN ANCIENT HISTORY

We are often asked by our clients to suggest background reading in ancient history. Accordingly we are now making available selected works in English of a number of celebrated classical historians, in low-priced Penguin paperback editions. These titles are certain to increase your knowledge of the specific historical events influencing ancient coinage, as well as enhancing your appreciation of classical civilization in general.

The fifth-century "father of history" included legends and hearsay as well as fact in his writings; his geographical and chronological limits correspond closely to those of numismatic history in the East Greek world—the Lydian Empire, the Persian Empire, the Ionian Revolt, the Persian Wars. | 3.95 |
| P7. Livy, The Early History of Rome (Ab urbe condita, books i-x). Annalistic treatment of Rome's origins and conquest of Italy. | 2.95 |
| P8. Livy, Rome and the Mediterranean (Ab urbe condita, books xxxi-xlv). Annalistic treatment of the Macedonian and Syrian Wars, which expanded Roman influence to Macedon, Greece and Asia Minor. Throws light on such historical giants as Antiochus the Great, Philip V and Perseus of Macedon, Ti. Quinctius Flaminius and Aemilius Paullus. | 4.95 |
| P9. Livy, The War with Hannibal (Ab urbe condita, books xxi-xxx). Annalistic treatment of the Second Punic War, the greatest crisis of the Roman Republic. | 3.95 |
| P10. Plutarch, The Age of Alexander. An essentially literary conception of biography, placing character and moral lessons above factual accuracy or historical perspective. Nevertheless Plutarch more than any other writer shaped the Renaissance and popular modern idea of the great men he wrote about. | 2.95 |
| P11. Plutarch, The Fall of the Roman Republic. Six Roman lives: Marius, Sulla, Crassus, Pompey, Caesar, Cicero. Inspirational. | 2.95 |
| P12. Plutarch, Makers of Rome. Lives of Republican Roman patriots. See P10. | 2.50 |
| P13. Plutarch, The Rise and Fall of Athens. Nine Greek lives. See P10. | 2.95 |
| P14. Sallust, The Jugurthine War and The Conspiracy of Catiline. Generally censorious descriptions of the rise of Marius and the clash of Cicero, Cato and Caesar, illuminating both events and attitudes which contributed to the decline of the Republic. | 2.95 |

- P15. *Scriptores Historiae Augustae, Lives of the Later Caesars*. Anonymous fifth-century biographies of third-century emperors—often scandalous or semi-legendary, but the only literary source we have for some of the obscure usurpers of this dark century. 2.95
- P16. Suetonius, *The Twelve Caesars*. Entertaining, spicy and outrageous anecdotes rather than serious historiography, but based upon confidential material in the imperial archives of Hadrian's day. A must. 2.50
- P17. Tacitus, *The Annals of Imperial Rome*. Annalistic history of Julio-Claudian Rome, 14-68 A.D., focussing on the Principate. Elevated in tone, biassed by the author's admiration for Republican institutions, yet strictly accurate in point of fact. 2.95
- P18. Tacitus, *The Histories*. Covers the Year of the Four Emperors (69 A.D.), with the same virtues and Republican bias as the preceding. 2.50
- P19. Thucydides, *The Peloponnesian War*. Extremely detailed eye-witness account of the war which ruined Athens and the internal political struggles which influenced the war. Careful research combined with vivid dramatizations of leading personalities (Pericles, Alcibiades) make this a literary and historiographical masterpiece. 3.95
- P20. Xenophon, *The Persian Expedition (Anabasis)*. Eye-witness account of the adventures of a band of Greek mercenaries in the Persian Empire at the turn of the fourth century B.C. 3.50

A CATALOGUE OF THE CALOUSTE GULBENKIAN COLLECTION
OF GREEK COINS

PART I: ITALY, SICILY, CARTHAGE

by E. S. G. Robinson (Lisbon, 1971)

This two-volume set is famous both for the exquisite taste of the collector, who pursued condition as avidly as he pursued artistic merit, and for the unparalleled fineness of the plates. The 389 coins published here include virtually every coin of aesthetic importance struck in the West. Many specimens carry distinguished pedigrees. E. S. G. Robinson's English text provides not only detailed descriptions, but historical background, discussion of types, notes on the artists and sophisticated bibliography. An essential book for the admirer of South Italian and Sicilian numismatics.

A CATALOGUE OF GREEK COINS FROM THE POZZI COLLECTION

(Part Two of the Pozzi Collection)

This new work has been prepared by M. Serge Boutin of Paris, with an introduction by M. Georges le Rider, Directeur-General of the Bibliotheque Nationale. 4630 coin of European Greece are carefully described, with cross-references to the latest scholarly publications. All coins are illustrated on the 202 high-quality plates. This will be a particularly important reference work because of the 1500 magnificent bronzes in the collection. Most previous published collections have not illustrated bronzes at all, or else have plated well-worn specimens. Text in French.

Expected publication date—October 1979

Expected price—\$75.00

Numismatic Fine Arts will be the sole authorized U.S. distributor of this title.
